

Visiting the Museum

I'm going to visit the
North Carolina Museum of Natural Sciences.

The Museum is in downtown Raleigh, North Carolina.

NORTH CAROLINA **Museum of Natural Sciences**

The Museum is very big and has two buildings:

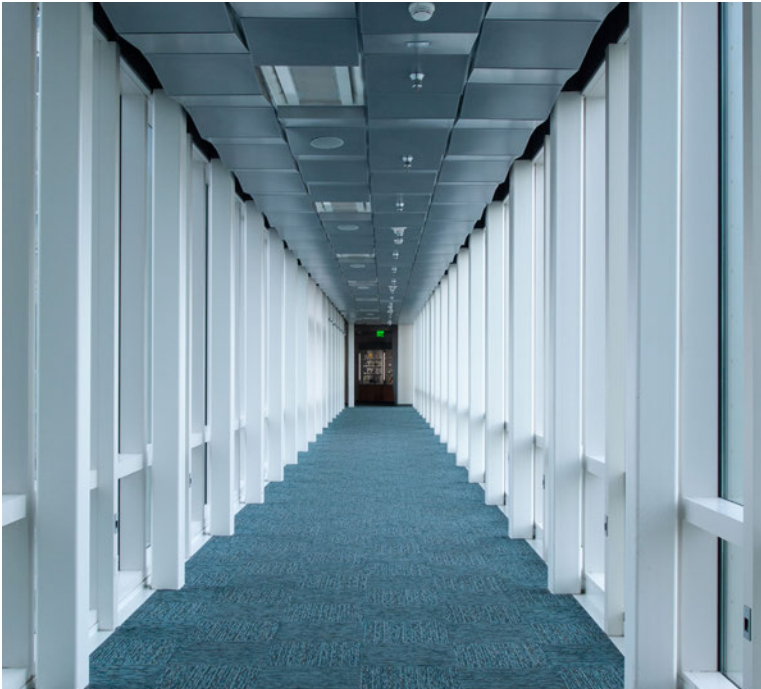

the
Nature Exploration Center

&

the
Nature Research Center.

**I can walk across the bridge
that connects the buildings.**

There's an
indoor bridge

&

an
outdoor bridge.

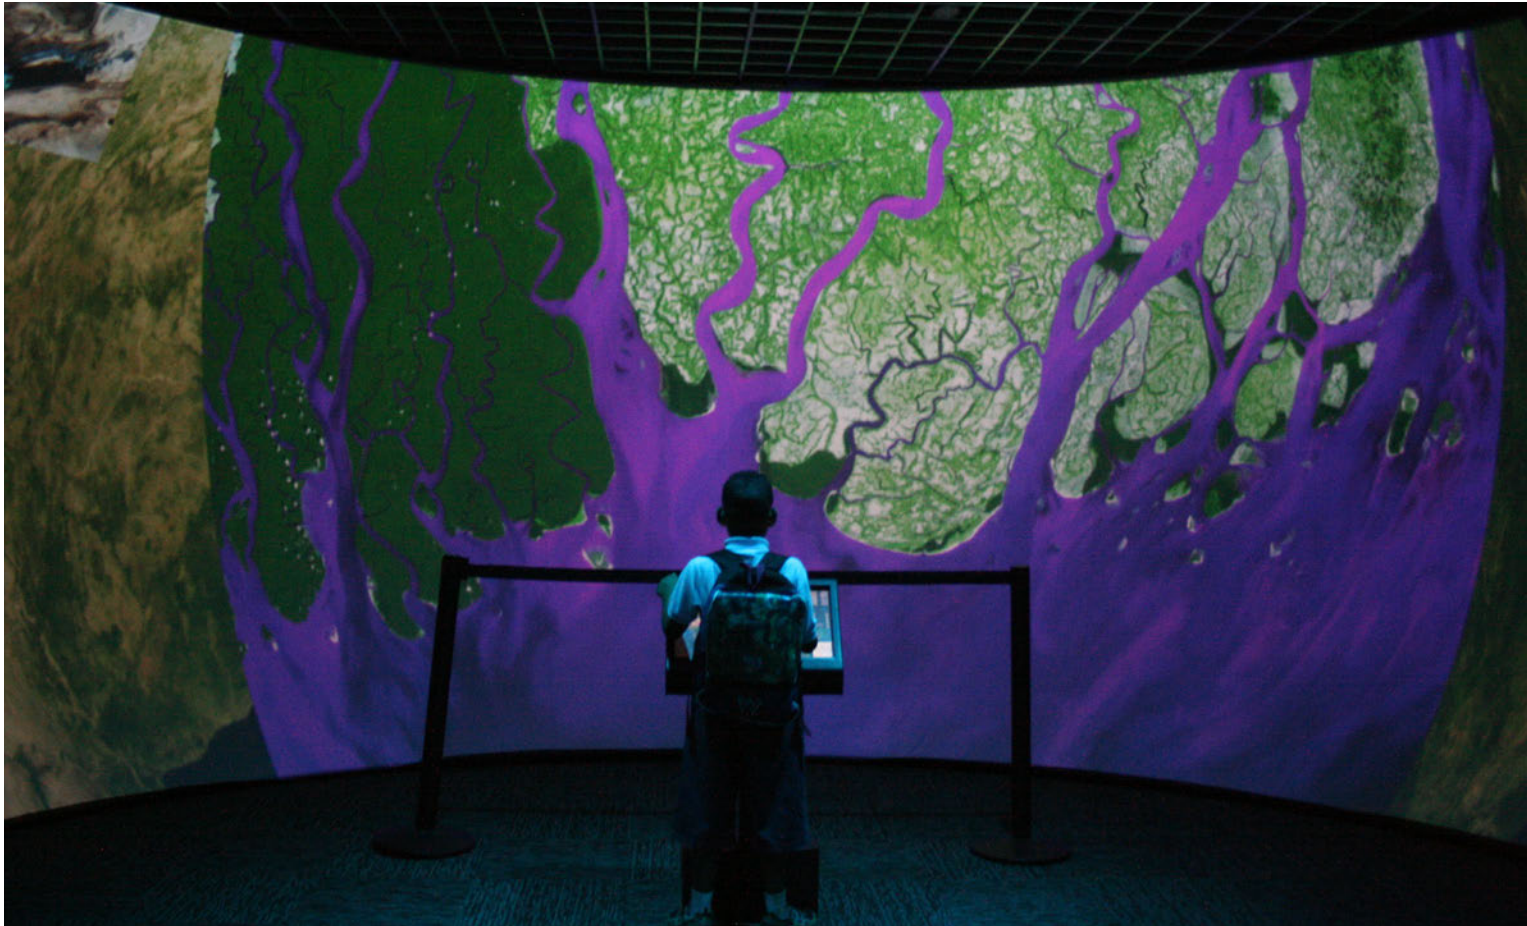

**I'm going to stay close to my friends and family
at the Museum.**

They will help me have fun and stay safe.

**Sometimes the Museum can be
a bit busy or loud.**

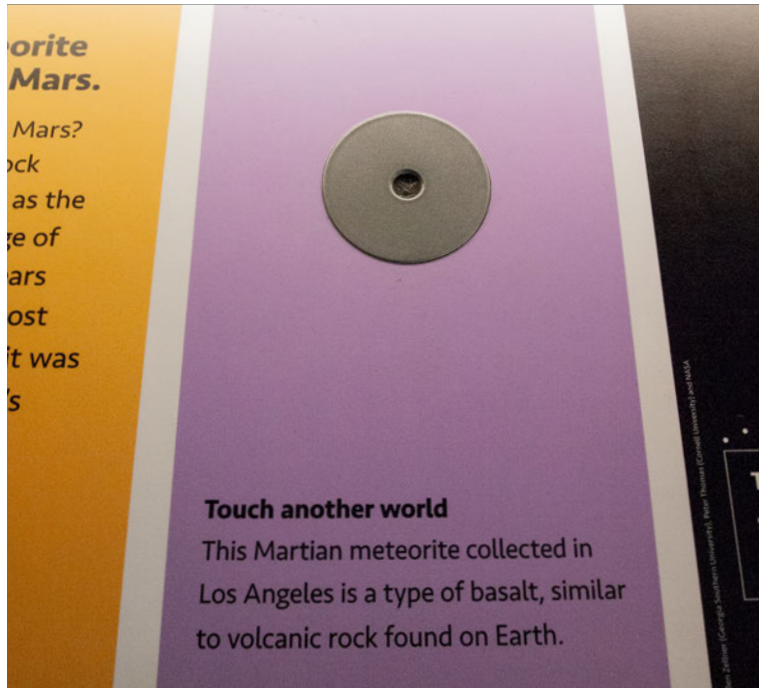

**There are quieter areas in the Museum
if I need them.**

**If I need help, I can talk to friendly staff
at the Information Desk.**

There are some things I CAN touch at the Museum,

like this meteorite
from Mars...

...or this *T. rex* skull.

**There are some things behind glass or walls
that I can't touch,**

like these rubies.

**I can see live animals
at the Museum,**

like this two-toed sloth.

**I can see fossils and bones
at the Museum,**

like this right whale skeleton.

**I can see preserved animals
at the Museum,**

like this grey fox.

I can't wait to visit!
